Rack Pod

The Rack Pod is the most portable cost saving system available today. The ideal solution to your pre production installs designed to be shipped fully loaded and tested to arrive on site ready for hook up. Multiple Rack Pods are connected with raised flooring to create any size of equipment room needed. Each Rack Pod consists of four 44RU or two 44RU 36" deep, welded, gangable racks that securely mount to a 6 3/4" high metal skid constructed with 4"x6" structural tubing positioned between two layers of 3/8" laser cut aluminum allowing access from all sides. A variety of layouts are available.

Features:

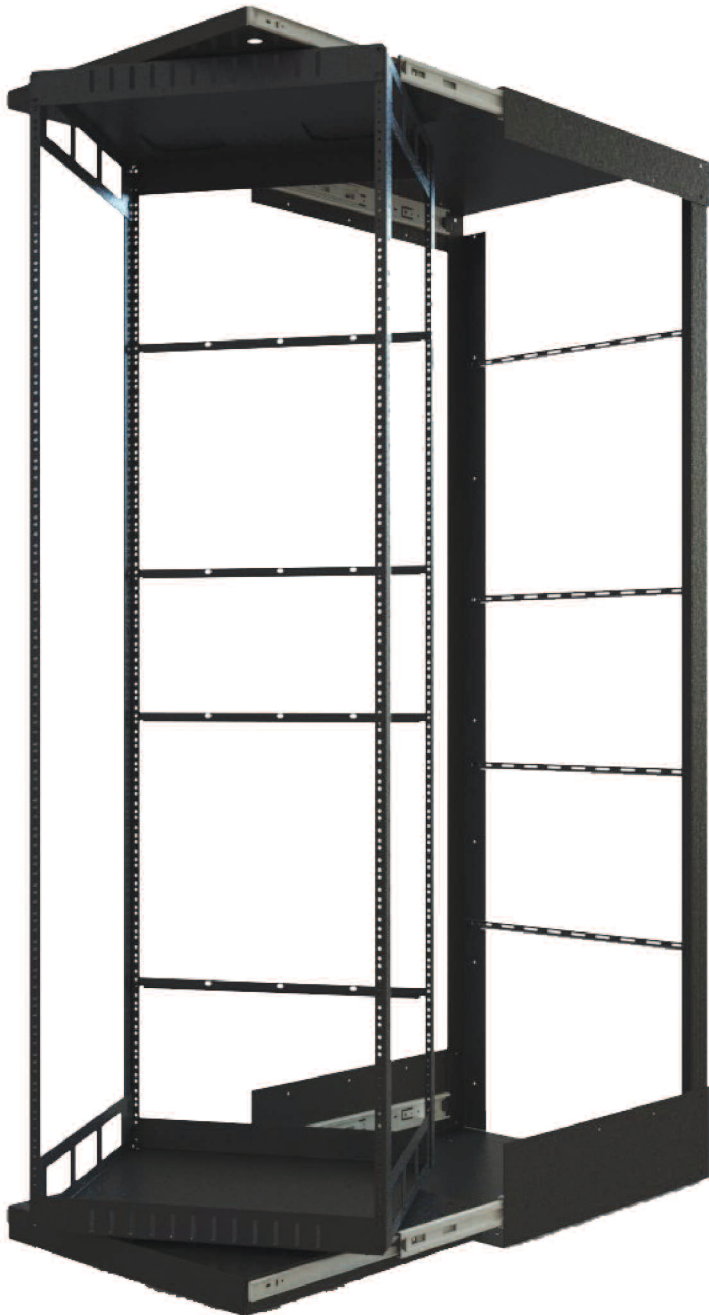

- Angle braces for added strength and stability.
- Front and rear adjustable rack rails.
- Upper corner eye bolts for anchor points during shipping and for earthquake spec compliance.
- Grounding lugs.
- Rubber grommets on cable openings.
- Bottom travel covers to protect cables during movement.
- Aluminum and steel base skid with space for pump truck forks and cables.
